

GIOTTO BY ROCKET ESPRESSO MILANO

The name Giotto can most confidently be considered an industry benchmark brand for its build quality that has never been compromised.

Starting at the very end of the process, by creating the perfect espresso, the engineers work in reverse to create the ultimate espresso machine. Purpose built with the very best in traditional craftsmanship and technical knowledge, all to reflect the commercial machine experience at home.

The boiler with heavy end plates and capacity of 1.8 litres has been matched to the thermosyphon system allowing the balance of the espresso machine which enables the ability to texture perfect milk and optimizing perfect extraction temperature for the tastes and flavours of espresso, without delay.

The Giotto is available in two versions, Tipo V with a Vibration Pump and Tipo R with a Rotary Pump.

Both R and V models are temperature controlled by PID logic for enhancing the users experience and control over the espresso quality. The PID touchpad is easily accessed underneath the front drip tray.

Research and development at the Rocket Espresso Milano headquarters together with international customer feedback, has continued the evolution of the Giotto components, design and build quality for near 21 years. The unwavering reputation of a reliable machine with superior results has the Giotto supported, promoted and loved by the coffee industry as the Barista's home choice.

GIOTTO

Rocket Espresso Milano

- Tipo V with Vibration Pump.
- Tipo R with Rotary Pump (with optional mains water kit).
- E61 style chrome plated brass group head is 4.05 kilo (9 lbs).
- Lever activation for espresso.
- Insulated wrapped boilers with 9mm brass end plates for enhanced Thermal performance and stability.
- PID Logic controlled via LED touchpad.
- Height adjustable feet.
- Stainless Steel Cups Frame as Standard.

Boiler	1.8L Heat Exchange
Tipo V Hydraulic Pump System	Vibration
Tipo R Hydraulic Pump System	Full Sized Rotary Pump and Motor
Boiler Pressure Control	PID Logic
Reservoir	2.9 L
Hard Mains Plumbing Connection	Tipo R Only
Steam Assembly	Cool Touch Steam Arm
Wattage	1200 watts
Tipo V Dimensions (WxDxH) mm	274 x 425 x 360
Tipo R Dimensions (WxDxH) mm	280 x 425 x 400
Tipo V Weight (kg)	25.4 kg
Tipo R Weight (kg)	30.2 kg
