

Stagg™ Pour-Over Kettle

Safety and Use Guide

The Stagg Kettle is meant for home use. Please read this guide completely before using Stagg. Improper handling may result in an accident. Please keep this guide for future reference.

Stagg Kettle is compatible with the following cooking ranges:

Electric

Gas

Induction

Please do not use with the following:

Microwave

Oven

Important Safety Notes

- Please check your product to ensure no issues before usage. Do not use if you see any sign of cracking, chipping, denting, or any other abnormality.
- This product is only intended for boiling water. Do not use for any other purpose.
- Do not fill water to brim, only to max fill line. Stagg's max fill line is just below the kettle's handle.
- Never heat Stagg while empty, this may deform or damage the kettle or cause damage to the cooking range and increase the risk of fire.
- Do not put hand over lid area or remove lid while kettle is heating or when water is boiling. Hot steam may be released, which may cause burn injury.
- The handle may become hot while boiling water or soon after boiling water. Please use a pot-holder to avoid burn injury.
- Keep the product away from children while boiling water and soon after boiling water.
- If the handle is damaged or loose, do not use. Do not attempt to repair or modify the handle.

Use Instructions

Preparation Before Use:

- Apply some dish-washing detergent on a soft sponge. Wash the product and rinse thoroughly. Do not use chlorine or bleach.
- Only wash with a soft sponge. Any coarse sponge will scratch the finish.

Using Stagg On Various Cooking Ranges:

- Wipe away any water on the bottom of the kettle before heating.
- Take care to place the kettle at the center of the heater.
- **Electric Ranges + Induction Cookers:** Do not use a burner that is larger than the bottom diameter of the kettle. Excessive heating may melt the handle and lid.
- **Gas Ranges:** Do not spread the flame beyond the bottom of the kettle body. The handle and lid may become over heated and melt if the flame is too large.

Caution:

- Please do not over boil Stagg Kettle. Since the pour spout and body opening are small, there is a risk of water boiling out from these openings.
- Do not use the product to boil a small amount of water (less than one third full). This can overheat the kettle and lead to discoloration or damage.

Care After Use:

- Wash the product thoroughly using a soft sponge. Wipe off any water and let the product dry thoroughly.
- Allowing traces of salt or oil to remain in contact from other products made of steel or aluminum may cause corrosion to develop.
- If any sign of corrosion is discovered, apply some compounding polish on a soft sponge and rub. Rinse thoroughly afterwards.
- White spots may appear as you keep using the product. This is caused by magnesium and calcium residue contained in tap water. This is not harmful to your health. Please wash and dry thoroughly after use to avoid.
